

These instructions and accompanying data file layout specifications apply to the:

**CAHPS Clinician & Group Survey Data File Specifications**

Submitting data to the CG-CAHPS Database requires survey data to be organized by group, practice site and respondent-level records in order to receive access to the CAHPS Database Online Reporting System.

## **Number of files to be submitted**

Three separate flat files (Group Data File, Practice Site Data File and Sample Data File) make up a CG-CAHPS submission and are detailed below.

- **Group Data File:** Each line in the group data file represents a medical group. Multiple groups can be added to the data file using a unique ID for each. Submit one group data file for each Participating Organization. If there is no group level in the Participating Organization, a group data file is not required.

A group can be defined as a medical group, ACO, state organization or some other grouping of practice sites. A group is not a vendor organization.

- The **Group ID** variable must be consistent to link the group, practice site and the sample files. The Group ID must be consistent with the Group ID that the Participating Organization uploaded with the DUA.
- The **Group Name** variable is exactly how the name will be displayed in the Online Reporting System. The Group Name must be consistent with the Group Name that the Participating Organization uploaded with the DUA.
- The **Group Contact Name, Phone and Email** are required to receive access to group-level and below reporting. Do not provide vendor information.

- **Practice Site Data File:** Each line in the practice site data file represents a practice site. Multiple practice sites can be added to the data file using a unique ID for each practice site and matching ID to the related group. Submit one practice data file for each Participating Organization.

A practice site can be considered a medical office. A practice site is an outpatient facility in a specific location. Each practice site located in a building containing multiple medical offices is considered a separate practice site. Providers in a single practice site should share administrative and clinical support staff.

- The **Practice Site ID** variable must be consistent to link the group, practice site and the sample files. The Practice Site ID must be consistent with the Practice Site ID that the Participating Organization uploaded with the DUA.
- The **Practice Site Name** variable is exactly how the name will be displayed in the Online Reporting System. The Practice Site Name must

match the Practice Site Name that the Participating Organization uploaded with the DUA.

- The **Practice Site Contact Name, Phone and Email** are required to receive access to practice level reporting. Do not provide vendor information.
- **Sample Data File:** Each line in the sample data file represents a sampled individual. Please submit one sample file per Participating Organization, per questionnaire.

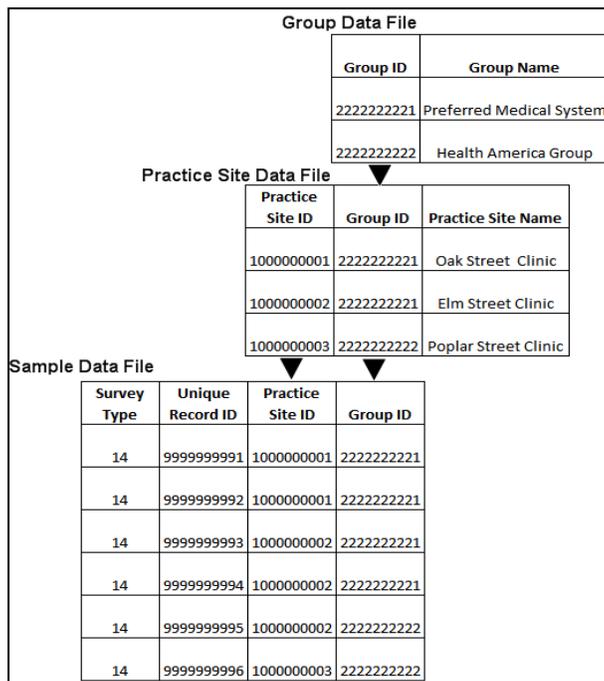

A record must be submitted for each sampled individual. For unreturned surveys, leave all question fields blank.

## **Data files are associated through IDs**

Each of the required data files includes one or more ID fields. These ID fields (and their associated values) are critically important as they create a link between the data files that are submitted. For example, the Sample data file specification requires that each record include not only a unique “person-level” identification number, but each person-level record must also include an ID field that represents each of the Groups and Practice Sites that were surveyed.

The following example illustrates how the Group data file, Practice Site data file, and Sample data files are related to one another via the ID fields when there is more than one Group.

### **Example: Associated Group and Practice Site IDs**

This example shows that there are two Groups (Preferred Medical System and Health America Group). The Group ID for each of these two Groups are repeated in both the Sample data file and in the Practice Site data file. This example also shows that practice sites Oak Street Clinic and Elm Street Clinic are affiliated with the Preferred Medical System (Group ID =222222221 for Practice Site ID 100000001 and for Practice Site ID 100000002). Similarly, the example shows that practice site Poplar Street Clinic is affiliated with Health America Group (Group ID = 222222222 for Practice Site ID 100000003).

**Group ID/Name and Practice Site ID/Name must be in agreement with the corresponding ID fields and names provided with the DUA.** Information in the Group data file and the Practice Site data file will be compared to the practice list received with the DUA. The Participating Organization must complete and submit an Excel file with the DUA. This file must contain a list of all practice sites under this DUA. The Group ID/Name and Practice ID/Name must match what was provided by the Participating Organization in the Excel file to proceed to the next step.

### **Reporting structure**

The structure of the files and the IDs used for linking the three files reflects how the data will be reported. Using the previous example, two Group reports and three Practice Site reports would be generated. The Group Contact would have access to Group and Practice Site reporting, while the Practice Site contact can only access the individual Practice Site reports. Here is how the reports would be organized in the Online Reporting System:

- Preferred Medical System (aggregated results of Oak and Elm Street Clinics)
  - Oak Street Clinic
  - Elm Street Clinic
- Health America Group (same results for both the group and practice site)
  - Poplar Street Clinic

### **Additional information about the data files**

**Group Data File.** The Group data file contains one record for each unique Group that participated in the survey and describes the “parent” organization(s).

Practice sites are considered to be “children” of the parent organization and are defined in the Practice Site data file. Practice Sites that are not a part of a parent organization are NOT required to be linked to a Group or submit a Group data file. However, they must submit a Practice Site and Sample data file.

Each Group must be uniquely numbered using the Group ID field. There is a 50-character Group Name field that is used to name each Group in the reporting.

**Practice Site Data File.** The Practice Site data file contains one record for each unique practice site that participated in the survey. Each practice site must be

## Child Survey with PCMH Items 2.0

---

uniquely numbered using the “Practice Site ID” field. There is a 50-character field that is used to name each practice site (practice site name).

If the practice sites are named similarly, consider using as many of the 50 characters as necessary to distinguish among them. For example, “Primary Care Health Clinic – West” or “Primary Care Health Clinic – East”.

**Sample Data File.** The Sample data file contains ID fields that are associated with the Group file and with the Practice Site file. Make certain that the values assigned to these ID fields are in agreement with the corresponding ID fields and values in the other file(s).

Each record in the Sample data file must be uniquely numbered using the field “Unique Record ID”. This file must contain **one record for every person who was sampled** to participate in the survey – irrespective of the final disposition or survey status (e.g., completed survey, ineligible, refused to participate, etc.) The file specifications provide detailed information about the values that can be assigned for survey disposition.

**File format.** All data files are to be submitted in flat, ASCII file format and must conform to the file layout specifications.

As noted above, it is critical that the values assigned for the ID fields accurately correspond to one another.

ID fields in the Group, Practice Site, and Sample data files are 10 digits in length. DO NOT assign any ID values with a leading “0” (zero).

### **Missing Value Assignments**

**Make sure to use the following missing values.**

<b>Reason for missing value</b>	<b>Application</b>	<b>Missing value</b>
Appropriately skipped	Indicates the respondent appropriately skipped this question.	S
Multiple mark	Multiple marks made it impossible to identify the response.	H
Missing	No response, not part of skip pattern.	M
Question not included	A question is not included in the survey questionnaire	Blank

## **Group File Layout**

## Child Survey with PCMH Items 2.0

- **Group data file must be in ascii/flat format.**
- **The file must contain one record for each Group that administered the survey.**
- **Group ID in this file must match IDs in Practice Site and Sample data files.**
- **Group ID and Group Name in this file must match ID and Name from the Excel file that Participant Organizations provided with the Data Use Agreement (DUA).**
- **The data file must conform to the layout specifications below.**

Variable Description	Field Position	Value Labels	Details/Comments
Group ID	1 - 10	10 characters	Unique ID is used to match the practice sites provided with the DUA and to match records in this Group data file to the Sample Level data file & Practice Site data file.
Group Name	11 - 60	50 characters	Name of the group. Use unique names to distinguish entities for reporting purpose. Group Name is used to match the groups provided with the DUA. This is the name that will be listed in the Online Reporting System.

## **Practice Site File Layout**

## Child Survey with PCMH Items 2.0

- Practice Site data file must be in ascii/flat format.
- The file must contain one record for each Practice Site that administered the survey.
- Practice Site and/or Group ID must match IDs in Sample and Group data files.
- Practice Site ID and name in this file must match ID and name from the Excel file that Participant Organizations provided with the Data Use Agreement (DUA).
- The data file must conform to the layout specifications below.

Variable Description	Field Position	Value Labels	Details/Comments
Practice Site ID	1 - 10	10 characters	Unique ID is used to match the practice sites provided with the DUA and to match the records in this Practice Site data file to the Sample Level data file & Group data file.
Group ID	11 - 20	10 characters	Unique ID is used to match the records in this Practice Site data file to the Sample Level & Group data file.
Practice Site Name	21 - 70	50 characters	Name of the practice site is used at the reporting level. Use unique names to help distinguish entities. Practice Site Name is used to match the practice sites provided with the DUA. This is the name that will be listed in the Online Reporting System.
Street Address 1	71 - 100	30 characters	
Street Address 2	101 - 130	30 characters	Floor or Suite
City	131 - 160	30 characters	
State	161 - 162	2 characters	2 character State abbreviation

## Child Survey with PCMH Items 2.0

Variable Description	Field Position	Value Labels	Details/Comments
Sample Size	178 - 184	XXXXXXXX	7 digit number. The sample size is the number of individuals drawn to receive a questionnaire for this practice site.
Field Period Start	185 - 192	mmddyyyy	8 digit date field. Date the survey fielding began.
Field Period End	193 - 200	mmddyyyy	8 digit date field. Date the survey fielding ended.
Response Rate	201 - 208	X.XXXXXX	8 spaces total, 6 decimal places.  The response rate is the total number of completed returned questionnaires divided by the total number of respondents selected minus deceased and ineligible.  For example, if 1,000 sampled patients yield 300 completed surveys minus 10 ineligible patients, the expected response rate is 0.303030.
Practice Contact Name	209 - 238	30 characters	Name of contact at practice site that may receive access to their online report. Do not provide vendor information. Vendors will not have access to private results.
Practice Contact Phone	239 - 248	XXXXXXXXXX	10 digit phone number of practice contact. <b>(Do not include spaces or dashes.)</b>
Practice Contact Email	249 - 298	50 characters	Email address of contact at practice level that may receive access to their CAHPS Database reports.
